

MEKRA LANG

... crystal clear view for a safe and secure future.

The new MEKRA camera generation - its advantages at a glance

- Fully suitable for automotive applications
- Virtually distortion-free (no fish-eye effect)
- High image quality, even under extreme glare conditions (reduced blooming, no smear)
- Plastic camera holder with numerous multidirectional configuration options
- Watertight, durable metal camera housing
- Built-in heating system ensures year-round operation
- Plug-in cable system, suitable for ADR
- Universal mounting system for all categories of commercial and passenger transport vehicles
- Usage is legally permissible according to Commission Directive 2003/97/EC
- User-friendly safety features provide for the elimination of blind spots
- Enhanced accident protection through combined use of vision systems

reflecting your visions.

Front Camera Image

reflecting your visions.

●... virtually distortion-free

For the first time the driver can realistically assess clearances - a MEKRA camera feature that essentially increases security for the driver and all road users.

●... low glare with incident light

A clear view even with incident light ensures safe driving.

Always one step ahead - MEKRA's new camera generation
