VISION 4.0
The next step in the evolution of sight

Last Update: September 2017 | Contents are subject to change

MEKRA Lang - passion for excellence.
Excellent Indirect Vision
High - End Cameras

We have reached the next evolutionary step in vision concepts. A completely new HDR-camera, improving your situational awareness and sight around your vehicle. A specially invented lens provides an image of the vehicle edge without almost any distortion. More safety for you and other people in traffic around you. See the most dangerous spots at a glance to protect others, reduce the risk of damage to your bus and improve fuel efficiency at the same time.

MEKRA Long - passion for excellence.
